O-higan—Recognizing the Importance of Balance

By Rev. Kenji Akahoshi

Shakyamuni Buddha lived the first 29 years of his life as a prince. After renouncing his luxurious life to seek truth, he joined five ascetics for six years of austere practices of physical deprivation. He rejected that method, as it brought him no closer to the Truth.

He then vowed to sit in contemplation, under the Bodhi tree, until he realized the supreme wisdom. As he emerged from his Enlightened state, he declared that the path to full awakening would be a middle path. By this, he meant that all things could be viewed as a spectrum or gradient between two opposite points.

His life experience taught him that choosing one side and neglecting the opposing side could only lead to disharmony. He saw the validity of a balanced perspective.

Many ancient cultures seem to celebrate the two extremes of the earth's seasons. The summer and winter solstice would signify the end point or pivotal day of one extreme. As Buddhists, we recognize the middle phase, between these two extremes. During the time of the Buddha, the spring and

An Attitude of Gratitude

By Bob Imai

I recently purchased the book **Attitudes of Gratitude** by M.J. Ryan. I've been reading it off and on for the past week and wanted to share some of the insights of being grateful.

Research is finding that an attitude of gratitude is a powerful contribution to a happy life. Some believe that it may be the single most effective way to increase happiness. There are many excellent quotes throughout the book. The personal vignettes are written deeply yet simply.

One of my favorites is "The Gifts of Gratitude" by Melody Beattie.

Gratitude unlocks the fullness of life. It turns what we have into enough, and more. It turns denial into acceptance, chaos into order, confusion to clarity… Gratitude makes sense of our past, brings peace for today, and creates a vision for tomorrow.

It is amazing how the simple act of changing my perspective, and ultimately, my attitude has helped me be in a better place.

Instead of seeing the negative in things and situations—the glass half-empty, I'm trying to see the positive, the glass half-full.

Instead of focusing on what I don't have, I try to focus on what I do have—right now. The privilege of just being an average Joe, or in my case an average Bob.

I think I've always given thanks for the things I've gotten and the help I've received, but often it's just perfunctory.

O-higan—Recognizing the Importance of Balance (Cont'd fr P.1)

fall of the year would be an ideal time for the monks to study and reflect. The temperature would not be too hot nor too cold. The O-higan Services are held in the spring and fall, to recognize the importance of this perspective of balance.

The middle path is a simple expression of a deeper, complex theory of non-duality.

This simply means that taking one position always invites an opposing view. The useful path is one that incorporates parts of each side. This perspective may seem counter-intuitive, since we usually favor one side. The wisdom of this perspective is that all sides are considered. This affirms the truth of interdependence as all sides are connected and contribute to the whole.

This may seem complex, but only says what nature does naturally. If we look at any natural terrain that has not been influenced by human intervention, everything is there because it has been balanced by many factors. The sun, rain, soil, climate, and geography all determine the types of plants, trees, insects, and animal and bird life that live there. ***The lesson for us is that living in a balanced way leads to a harmonious life***.

The validity of this truth is witnessed by the inability of our present Congress to find a middle path. By clinging to extreme positions, no progress is made. Compromise means that each side honors the position of the other.

Thus, the middle path brings harmony.

The Bay Area has a pretty moderate climate. The difference between summer and winter are not very extreme. So I really didn't appreciate the transition of seasons during the spring and fall.

But I spent three years in northern Japan in the Air Force after college. This was my first experience living in another country with a different weather system. The summers were very hot and humid and the winter had snow for several months. We lived in an uninsulated, thin-walled, Japanese house. I really appreciated the warmth of spring after a cold winter. And conversely, I felt the relief of the cooler days of autumn. The significance of O-higan made a greater impression on me, as I physically experienced the wisdom of the middle path.

O-higan is a significant reminder of this basic lesson of the Buddha. As we enjoy this middle transition between weather patterns, we might adapt this lesson from nature into other aspects of our lives.

Most holidays are celebrated once a year. The fact that O-higan is observed twice a year, in the spring and the fall, might indicate the importance of this lesson of the middle path. Let this double reminder inspire us to truly lead a balanced life that leads to harmony.

An Attitude of Gratitude (Cont'd fr P. 1)

Instead, I'm trying to give thanks more deliberately. Like anything it takes effort and dedication. I sometimes get lazy and fall back to my old habits, but I'm trying.

I'd like to express my heartfelt gratitude to the Sangha for helping me as the President of the Mountain View Buddhist Temple—particularly those who have helped me without special reward like our past Presidents and Reverend Koyama.

Thank You!
